

## FREE WIRELESS INTERNET IN NOVI SAD

The Public Utility Company "Informatika" has provided all the citizens of Novi Sad and our guests with the enhanced speed of free wireless Internet, from July 5th to 10th, 2011. Its usage is very simple – after accessing the network "gradnovisad", both the username and password are "volimnovisad".

### 24-hour-a-day access to web content – for free!

Thanks to the existing optical infrastructure of the city, you can skype, chat or like Facebook content while sitting on benches or in cafés downtown, from the Petrovaradin Fortress, the parks or the Strand...

The free wireless Internet under the open sky of Novi Sad is a result of a previously conducted project of the City of Novi Sad and the Public Utility Company "Informatika" - the optical communal infrastructure of the city. This infrastructure is a part of the telecommunication system of the City of Novi Sad, whose construction, maintenance and servicing is under the jurisdiction of the Public Utility Company "Informatika".

The telecommunication system of the City and the Public Utility Company "Informatika" are unique in many ways, but what particularly singles them out is a wish for IT tools to become citizen-centred, all for the purpose of a better and more humane life. As a result of this effort, Novi Sad has become a unique city in the country, the only one at the moment to possess an infrastructure which contributes to the modern functioning of the whole city.

Welcome to our network, the network of Novi Sad!

# ENJOY!

## BESPLATAN BEŽIČNI INTERNET U NOVOM SADU

Za sve Novosađane i goste našeg grada, JKP „Informatika“ omogućila je pojačan signal besplatnog bežičnog interneta od 5. do 10. jula 2011. Korišćenje je vrlo jednostavno – nakon pristupa mreži „gradnovisad“, korisničko ime i lozinka su „volimnovisad“.

### Non-stop pristup internetu – besplatno!

Zahvaljujući postojećoj optičkoj infrastrukturi grada, možete da skajpujete, četujete, lajkujete sa Petrovaradinske tvrđave, dok sedite na klupama ili u kafiću u centru grada, parkovima, plaži Štrand...

Bežični internet pod vedrim novosadskim nebom rezultat je ranije postavljenog projekta Grada Novog Sada i JKP „Informatika“ - optičke komunalne infrastrukture grada. Ova infrastruktura deo je telekomunikacionog sistema Grada Novog Sada, čija je izgradnja, održavanje i servisiranje u nadležnosti JKP „Informatika“.

Telekomunikacioni sistem grada i JKP „Informatika“ jedinstveni su po mnogo čemu, ali ono što ih svakako izdvaja je želja da tehničke i informatičke alate dovedu u službu građana, boljeg i humanijeg življenja. Zahvaljujući ovom naporu, Novi Sad je jedinstven grad u državi, jedini koji u ovom trenutku raspolaže infrastrukturom koja doprinosi modernom funkcionisanju čitavog grada.

Dobrodošli na našu, novosadsku mrežu!

# UŽIVAJ!

Posle ove promo akcije, username i password su "gost"
